Drug Demand Reduction

- All countries are affected by the devastating consequences of drug abuse and illicit trafficking. Its adverse effects on health; an upsurge in crime; violence & destruction of individuals, families and communities need special attention of every one. As drug affects all sectors of society, therefore a dire need of working on demand reduction exists forever. Demand Reduction refers to efforts aimed at reducing public desire for illegal and illicit drugs. The media explosion has shrunken the world into village in real sense. Along with its positive contributions it has some negative aspects as well, especially for the youth as it has raised their level of aspiration, ambition and their tendency to experiment which may lead them to drug abuse. It may be an expression of their revolt against established authority, a way of gaining recognition in their group or they may just not be able to “SAY NO TO DRUG” when offered.
- Although In this regard ANF is continuing its efforts to create awareness amongst the masses especially the youth by involving different CBOs and NGOs. A summary covering awareness activities performed by ANF own sources during July-Sep 2014 is as follows:
